Subject: Microsoft Settlement

We believe that it is definitely in the best interest of the consumer for the case to be settled. We also feel that Microsoft has more than demonstrated a reasonable attitude and made every effort to settle this case, in the consumer's best interest. We are very tired of hearing all the complaints from Microsoft competitors and their special interest groups and in-turn the Attorney Generals from some states that seem to feel that it is their job to side with Microsoft competitors. We feel that the Microsoft competitors have the same opportunity in the USA as all businesses. They need to work a little harder, hire bright, and innovative employees and stop whining all the time.

Let's get on with getting the economy back on track. Stop punishing companies for hard work, brains, and innovation.

Thank you,

Nate and Sandra Ribelin
